

The Shredding Alliance. A better shredding service altogether.

We service 7,500 customers from 20 regional depots recycling over 40,000 tonnes of paper and offsetting over 50,000 tonnes of carbon annually.

Who are The Shredding Alliance?

The Shredding Alliance are information security destruction specialists. We help organisations manage, destroy and recycle while protecting against identity theft and fraud. We work nationally, servicing multi-site organisations from regional depots.

What do we do?

We provide a tailored information destruction service designed to manage and securely dispose of paper, IT assets and branded material ensuring your organisation and employees remain compliant.

Who do we service?

Our customers are SMEs and multi-site organisations as well as Waste Managers, Facility Management Service Providers and Recyclers. Each year, our regional depots handle information destruction for thousands of private, Central and Local Government sites across the UK.

Why shred and securely dispose of paper and IT assets?

- It's the only way to ensure compliance with the General Data Protection Regulations (GDPR)
- Outsourced shredding boosts employee productivity and recycling
- It enables you to reduce your carbon footprint
- Outsourcing reduces risk of fraud and identity theft
- For many regulated industries, it's part of their minimum operating standards

Our commitment to you

- We will work with you / your FM supplier to create a destruction service based on data usage per site
- We'll tailor a programme designed to reduce outsourced destruction expenditure by up to 75%
- We will help identify weaknesses in your information security process and help you educate staff about best practice
- You can choose between on-site, off-site, regular, one-off and 16mm down to 4mm shredding sizes
- You'll find our customer service outstanding - we're known for our friendliness and efficiency
- All shredding services are fully compliant with BS EN15713:2009 which includes staff vetting to BS7858. We also hold an ISO9001:2008 accreditation which is annually audited by a UKAS approved body.
